

## SLIP-ON WATER CARTS FOR TRAY & TIPPER TRUCKS

# AQUAFILL | AQUAMAX | AQUAPRO

## APPLICATIONS

### DUST SUPPRESSION

Used on site access roads, large holding transport yards, road construction sites, earthmoving site and more - anywhere that dust is being generated.

#### Dust Suppression Features

- Triple deflector system easily suppresses dust with added convenience of remote actuator for in-cab on/off control
- Each deflector individually controlled by ball valves for directional spray control
- Spot dust control, rinsing and wash down operations made easy with 36m hose and reel with variable spray, twist action nozzle
- Individually operable deflectors for directed spray - select left, right or centre sprays for any combination as required

### LANDSCAPE MAINTENANCE

Road verge watering, batter watering, tree watering - where you need to keep vegetation alive.

### FIRE FIGHTING

Excellent fire fighting capability; a safety factor on every work site.

### WATER CARTAGE

The transport and transfer of water for every application. Use as a reserve water supply to top up existing water supplies on-site

## COMPARING WATER CART SOLUTIONS: AQUAFILL, AQUAMAX, AND AQUAPRO

Explore the key features and differences between AquaFill, AquaMax, and AquaPro water carts, designed to fit tray and tipper trucks. Whether you're looking for maximum capacity, advanced functionality, or an economical solution, this comparison will help you choose the right water cart for your needs.
